

Implementors Student Portal

Student details

- Student Name
- Email ID (which will be used for communication)
- Mobile No (WhatsApp)
- Institution
- Class
- Subjects
- Stream
- College
- Course
- Year
- Father's Name
- Father's Occupation
- Father's Mobile
- Father's Email ID
- Mother's Name
- Mother's Occupation
- Mother's Mobile
- Mother's Email ID
- Targeted Exams (if any)
- Targeted Institutions (if any)
- Targeted Countries (if any)
- Targeted Courses (if any)
- Other targets (if any)
- LinkedIn ID (if any)

Note

There are some entries which are relevant/ valid for some students only

For eg, Class, Subjects and Stream for school students and College, Course and Year for college students. Have added both here to make sure the data structure is intuitive but for school students, the college details would be vacant so they should not be visible at their portal and similarly vice versa for college students. This will be initially implemented for school students as discussed.
